

ReferralMe 30-Day Content Plan

Ready-to-copy LinkedIn and ReferralMe page captions for ATS, AI Mentor, mentorship, referrals, and beta launch.

Positioning

ReferralMe is an AI Career and Placement Copilot for students and job seekers. The product story is not only referrals. The stronger story is: ATS resume feedback + AI Mentor + 30-day placement plan + mentorship + referral guidance.

How to Use This Plan

Post once per day from the ReferralMe page using the product caption.

Post once per day from your personal LinkedIn using the founder caption.

Convert each post into one simple visual: carousel, screenshot, short reel, or founder note.

Do not run paid ads yet. First build trust, collect feedback, and improve the product.

Keep the promise honest: no job guarantee, no referral guarantee, only better preparation and guidance.

Weekly Content Mix

Two posts per week about ATS, resume quality, and resume mistakes.

Two posts per week about AI Mentor, placement roadmap, and career direction.

One post per week about mentorship or mock interviews.

One post per week about referrals, networking, or professional outreach.

One post per week as a founder/product update from your personal profile.

Recommended Posting Format

ReferralMe page: Product-first voice. Show feature value, screenshot, student problem, CTA.

Personal LinkedIn: Founder-first voice. Share why you are building, what you learned, and honest product decisions.

CTA style: Use soft CTAs: Try ReferralMe, scan your resume, build your placement plan, share feedback.

30-Day Calendar Summary

Day 1 - Launch the bigger story: Product intro carousel: Problem -> ReferralMe solution -> key modules.

Day 2 - ATS awareness: Resume score screenshot or mock ATS dashboard.

Day 3 - AI Mentor demo: Screen recording: ask AI Mentor a career question.

Day 4 - Mentorship explanation: Mentorship marketplace screenshot.

Day 5 - Resume mistakes: Carousel: mistake -> fix.

Day 6 - Product journey: Flow diagram: ATS -> AI Plan -> Mentor -> Applications.

Day 7 - Weekly recap: Founder/product update post.

Day 8 - Low ATS score mentor CTA: ATS low score -> top fixes -> mentor review.

Day 9 - 30-day AI placement plan: Screenshot of Placement Plan tab.

Day 10 - Referrers as mentors: Referrer dashboard mentorship toggle screenshot.

Day 11 - Round-wise interview prep: Interview Prep feature demo.

Day 12 - Referral guidance: Before/after referral message carousel.

Day 13 - Applying everywhere: Job search mistakes carousel.

Day 14 - Feedback request: Feedback invitation post.

Day 15 - Mentor suggestion after ATS: ATS result -> suggested next step.

Day 16 - AI vs human mentor: Comparison graphic.

Day 17 - Mock interview concept: Mock interview checklist.

Day 18 - Dashboard improvement: Dashboard screenshot carousel.

Day 19 - Freshers: Fresher career roadmap graphic.

Day 20 - Professionals/mentors: Call for mentors post.

Day 21 - Weekly update: Product update post.

Day 22 - Resume bullet rewrite: Before/after resume bullet carousel.

Day 23 - Manual UPI booking reality: Manual payment flow diagram.

Day 24 - Safety/admin verification: Admin mentorship tab screenshot.

Day 25 - Ratings and trust: Rating system concept.

Day 26 - Full product journey: End-to-end product journey video.

Day 27 - No job guarantee honesty: Honest promise / no guarantee graphic.

Day 28 - College/campus ambassadors: Campus ambassador invitation.

Day 29 - Beta invite: Beta launch card.

Day 30 - Month recap and next step: Recap carousel: what changed, what is next.

Ready-to-Copy Captions

Use these captions directly. Replace links, screenshots, or examples where needed.

Day 1: Launch the bigger story

Visual idea: Product intro carousel: Problem -> ReferralMe solution -> key modules.

ReferralMe Page Caption

Meet ReferralMe.

ReferralMe is an AI-powered career platform for students and job seekers.

Use it to check your resume with ATS feedback, chat with an AI mentor, build a placement roadmap, prepare for interviews, book mentorship, and get referral guidance.

Your career prep should not be scattered across 10 tools.

ReferralMe brings it together.

CTA: Try ReferralMe at referralme.in

Personal LinkedIn Caption

I am building ReferralMe.

The first idea was simple: help students get referrals.

But the real problem is bigger.

Students do not only need referrals. They need direction.

Resume feedback. ATS score. Career guidance. Interview prep. Mentorship. Referral support.

That is what ReferralMe is becoming: an AI Career and Placement Copilot for students and job seekers.

Building publicly from here.

Day 2: ATS awareness

Visual idea: Resume score screenshot or mock ATS dashboard.

ReferralMe Page Caption

Your resume may be good, but is it ATS-ready?

ReferralMe ATS Scan helps you understand your overall score, skill match, keyword gaps, formatting issues, strong points, and top fixes.

Before applying to 100 jobs, first understand what your resume is telling recruiters and screening systems.

CTA: Start with a free ATS scan.

Personal LinkedIn Caption

Most students think their resume is fine.

But recruiters and ATS systems do not read resumes like humans do.

Common problems I see:

- weak keywords
- no measurable impact
- poor formatting
- generic project descriptions
- unclear target role

Before applying everywhere, fix the resume first.

That is one of the first problems we are solving with ReferralMe.

Day 3: AI Mentor demo

Visual idea: Screen recording: ask AI Mentor a career question.

ReferralMe Page Caption

Ask ReferralMe AI Mentor:

'I want an SDE role, but I do not know what to do next.'

The AI Mentor can help you create a practical plan for resume improvement, skills, interview prep, job applications, and mentorship.

It is built to turn confusion into next steps.

CTA: Open AI Mentor inside ReferralMe.

Personal LinkedIn Caption

A lot of students are not lazy.

They are confused.

They do not know what to fix first: resume, projects, DSA, LinkedIn, interviews, or referrals.

That is why I am building AI Mentor inside ReferralMe.

The goal is simple: help students understand the next best step instead of randomly applying and hoping.

Day 4: Mentorship explanation

Visual idea: Mentorship marketplace screenshot.

ReferralMe Page Caption

Sometimes AI guidance is enough.

Sometimes you need a human mentor.

ReferralMe mentorship helps students book sessions with professionals who can review resumes, explain job strategy, conduct mock interviews, and give focused career guidance.

AI gives structure. Human mentors give personalization.

CTA: Explore Mentorship on ReferralMe.

Personal LinkedIn Caption

Referrals alone cannot solve the student placement problem.

If the resume is weak, the interview prep is poor, or the student is applying without direction, a referral will not magically fix everything.

That is why ReferralMe includes mentorship.

The right mentor can save weeks of confusion.

Day 5: Resume mistakes

Visual idea: Carousel: mistake -> fix.

ReferralMe Page Caption

5 resume mistakes that reduce shortlist chances:

1. No target role clarity
2. Weak project descriptions
3. Missing role keywords
4. No numbers or outcomes
5. Poor formatting for ATS parsing

ReferralMe helps you identify these issues and convert them into clear fixes.

CTA: Run your resume through ReferralMe ATS Scan.

Personal LinkedIn Caption

A resume is not just a document.

It is your first interview.

If it does not clearly show target role, skills, projects, impact, and proof, most recruiters will move on quickly.

One small resume improvement can change the number of callbacks a student receives.

This is why ATS and resume feedback is a core part of ReferralMe.

Day 6: Product journey

Visual idea: Flow diagram: ATS -> AI Plan -> Mentor -> Applications.

ReferralMe Page Caption

ReferralMe flow:

1. Check your resume with ATS
2. Get clear improvement suggestions
3. Use AI Mentor to build a placement plan
4. Prepare interviews round-wise
5. Book mentorship when needed
6. Use referral guidance professionally

Career prep should feel structured, not random.

CTA: Start your career prep on ReferralMe.

Personal LinkedIn Caption

The more I build ReferralMe, the more I realize one thing:

Students need a system.

Not one random referral.

Not one generic resume template.

Not one motivational post.

They need a workflow that tells them what to fix, what to practice, where to apply, and when to ask for help.

That is the product direction now.

Day 7: Weekly recap

Visual idea: Founder/product update post.

ReferralMe Page Caption

This week on ReferralMe:

We focused on helping students move from confusion to clarity.

Key areas:

- ATS resume feedback
- AI career guidance
- mentorship discovery
- referral guidance
- structured placement planning

If you are preparing for jobs or placements, try ReferralMe and share feedback.

CTA: referralme.in

Personal LinkedIn Caption

Week 1 of building ReferralMe publicly.

The biggest learning:

The market is not just referrals.

The bigger opportunity is helping students become job-ready before they ask for referrals.

Resume, ATS, AI guidance, mentorship, interview prep, and networking should work together.

That is what I am building toward.

Day 8: Low ATS score mentor CTA

Visual idea: ATS low score -> top fixes -> mentor review.

ReferralMe Page Caption

ATS score below 60?

Do not panic.

It usually means your resume needs clearer keywords, better project impact, cleaner formatting, or stronger alignment with the target role.

ReferralMe can show the gaps and suggest mentorship when human review would help.

CTA: Scan resume, then get guidance.

Personal LinkedIn Caption

An ATS score is not your worth.

It is a signal.

If the score is low, it simply means the resume is not communicating well for that role.

That is fixable.

I want ReferralMe to make this clear: students should not feel rejected by a score. They should know what to improve next.

Day 9: 30-day AI placement plan

Visual idea: Screenshot of Placement Plan tab.

ReferralMe Page Caption

New in ReferralMe AI Mentor:

A 30-day placement roadmap.

The plan helps students focus on:

- resume positioning
- ATS improvements
- skill gaps
- proof of work
- interview prep
- applications and networking
- mentor review

Less confusion. More structure.

CTA: Build your placement plan.

Personal LinkedIn Caption

I added a 30-day placement roadmap inside ReferralMe AI Mentor.

Why?

Because students often ask: 'What should I do next?'

A good answer is not one generic paragraph.

It should become a weekly action plan students can actually follow.

That is the direction I want ReferralMe to take.

Day 10: Referrers as mentors

Visual idea: Referrer dashboard mentorship toggle screenshot.

ReferralMe Page Caption

Professionals on ReferralMe can also become mentors.

If a referrer wants to guide students, they can enable mentorship, add services, set pricing, and appear in the seeker marketplace.

This helps students find people who understand real hiring expectations.

CTA: Referrers can enable mentorship from their dashboard.

Personal LinkedIn Caption

A senior professional can help in two ways:

1. Referral support when there is a real fit
2. Mentorship when the student needs improvement first

That is why ReferralMe lets referrers also become mentors.

It makes the platform more honest and useful.

Day 11: Round-wise interview prep

Visual idea: Interview Prep feature demo.

ReferralMe Page Caption

Interview prep should not be generic.

A technical round, HR round, project round, and manager round need different preparation.

ReferralMe AI Mentor helps students prepare round-wise so they know what to study, what to say, and how to improve.

CTA: Try Interview Prep inside AI Mentor.

Personal LinkedIn Caption

Most interview prep advice is too generic.

'Prepare well' is not useful.

Students need round-wise guidance:

- technical concepts
- project explanation
- HR stories
- manager round communication
- mock practice

This is why interview prep is becoming a core part of ReferralMe.

Day 12: Referral guidance

Visual idea: Before/after referral message carousel.

ReferralMe Page Caption

A referral request should be professional.

Do not just write: 'Please refer me.'

A better request includes:

- target role
- job link
- 2 fit bullets
- resume link
- polite ask

ReferralMe helps students prepare better before reaching out.

CTA: Use referral guidance the right way.

Personal LinkedIn Caption

Referrals work better when the ask is clear.

If you message someone with no context, no job link, and no proof of fit, the chances are low.

A good referral message respects the other person's time.

ReferralMe should teach students how to ask professionally, not desperately.

Day 13: Applying everywhere

Visual idea: Job search mistakes carousel.

ReferralMe Page Caption

Applying everywhere but getting no response?

The problem may not be the number of applications.

It may be:

- resume mismatch
- weak keywords
- unclear target role
- no proof of work
- poor follow-up

ReferralMe helps you diagnose the real issue first.

CTA: Start with ATS Scan and AI Mentor.

Personal LinkedIn Caption

Applying to 200 jobs with a weak resume is not a strategy.

It is stress.

Students need to apply smarter:

- target the right roles
- tailor the resume
- track outcomes
- improve weekly
- ask for referrals only where fit exists

This is the kind of system I want ReferralMe to provide.

Day 14: Feedback request

Visual idea: Feedback invitation post.

ReferralMe Page Caption

ReferralMe is in active improvement mode.

If you are a student, fresher, or job seeker, we want your feedback.

Try:

- ATS Scan
- AI Mentor
- Placement Plan
- Mentorship
- Referral guidance

Tell us what feels useful and what needs improvement.

CTA: Try ReferralMe beta.

Personal LinkedIn Caption

I am looking for honest feedback on ReferralMe.

Not polite feedback. Useful feedback.

If you are a student or fresher, try the platform and tell me:

- what confused you
- what helped you
- what felt missing
- what would make you pay for it

Building with real users is the only way.

Day 15: Mentor suggestion after ATS

Visual idea: ATS result -> suggested next step.

ReferralMe Page Caption

When your ATS score is low, ReferralMe does not just show a number.

It helps you understand what to fix and can suggest mentorship when deeper guidance is needed.

Because sometimes the best next step is not another application.

It is a better resume and a clearer plan.

CTA: Scan. Improve. Get guidance.

Personal LinkedIn Caption

I like this product logic:

If a student's ATS score is low, the platform should not only say 'bad score.'

It should suggest the next best action.

Maybe fix keywords.

Maybe rewrite projects.

Maybe book a mentor.

Maybe prepare interviews.

That is how ReferralMe becomes useful, not just another tool.

Day 16: AI vs human mentor

Visual idea: Comparison graphic.

ReferralMe Page Caption

AI Mentor vs Human Mentor.

Use AI Mentor when you need:

- quick guidance

- resume suggestions
- placement roadmap
- interview prep direction

Book a Human Mentor when you need:

- personal review
- mock interview
- deep resume feedback
- accountability

ReferralMe gives both.

CTA: Start with AI, upgrade to human help when needed.

Personal LinkedIn Caption

AI will not replace every mentor.

But AI can help students prepare better before meeting a mentor.

That makes human mentorship more valuable because the session becomes focused.

AI gives structure.

Humans give judgment.

ReferralMe should combine both.

Day 17: Mock interview concept

Visual idea: Mock interview checklist.

ReferralMe Page Caption

Mock interviews build confidence before real interviews.

ReferralMe mentorship can help students practice:

- technical answers
- HR stories
- project explanation
- communication
- confidence under pressure

Do not wait for the real interview to discover weak points.

CTA: Book a mentor/mock interview session.

Personal LinkedIn Caption

A mock interview can reveal more than hours of self-study.

Students often discover:

- they cannot explain projects clearly
- they know concepts but cannot communicate
- HR answers sound generic
- confidence drops under pressure

This is why mock interviews should be part of placement prep.

Day 18: Dashboard improvement

Visual idea: Dashboard screenshot carousel.

ReferralMe Page Caption

ReferralMe dashboard is being built as one place for career prep.

Inside, students can access AI Mentor, ATS feedback, placement planning, mentorship, and referral-related workflows.

The goal is simple: fewer scattered tools, more focused action.

CTA: Explore the ReferralMe dashboard.

Personal LinkedIn Caption

Behind the scenes, I am trying to keep ReferralMe powerful without making the dashboard cluttered.

That is hard.

Every feature sounds useful, but if the interface becomes confusing, students will not use it.

The product challenge is: more value, less noise.

Day 19: Freshers

Visual idea: Fresher career roadmap graphic.

ReferralMe Page Caption

ReferralMe for freshers.

If you are starting your career, use ReferralMe to:

- check your resume
- find skill gaps
- build a 30-day plan
- prepare interviews
- get mentorship
- learn referral etiquette

You do not need random advice. You need a system.

CTA: Start your placement plan.

Personal LinkedIn Caption

Freshers do not only need opportunities.

They need clarity.

What role should I target?

Is my resume good enough?

Which skills matter?

How do I explain projects?

When should I ask for referrals?

These are the questions ReferralMe should answer.

Day 20: Professionals/mentors

Visual idea: Call for mentors post.

ReferralMe Page Caption

ReferralMe is not only for students.

Professionals can join as referrers and mentors to help students with career direction, resume review, interview prep, and role-specific guidance.

If you have experience, your advice can save a student weeks of confusion.

CTA: Join ReferralMe as a referrer/mentor.

Personal LinkedIn Caption

If you are a working professional, you probably know things students are still guessing.

How hiring works.

What recruiters look for.

What makes a resume strong.

How interviews are evaluated.

That knowledge can genuinely help someone.

ReferralMe can become a place where professionals guide students responsibly.

Day 21: Weekly update

Visual idea: Product update post.

ReferralMe Page Caption

This week's ReferralMe focus:

- cleaner AI Mentor experience
- 30-day placement plan
- stronger ATS guidance
- mentorship booking flow
- better messaging around no job guarantee

We are building a practical career operating system for students.

CTA: Try ReferralMe and share feedback.

Personal LinkedIn Caption

Week 3 learning while building ReferralMe:

A career product must be honest.

We should not promise jobs.

We should not promise referrals.

We should not sell fake outcomes.

We can promise better preparation, better clarity, and better guidance.

That is the standard I want to keep.

Day 22: Resume bullet rewrite

Visual idea: Before/after resume bullet carousel.

ReferralMe Page Caption

Weak resume bullet:

'Worked on a React project.'

Stronger bullet:

'Built a React dashboard with reusable components, API integration, and responsive UI, reducing manual tracking effort for users.'

Impact beats vague work.

ReferralMe helps you improve resume clarity.

CTA: Run ATS Scan and improve your bullets.

Personal LinkedIn Caption

Most student resumes do not fail because students did nothing.

They fail because the work is written poorly.

A project needs to show:

- what problem you solved
- what tools you used
- what you built

- what improved

Writing impact clearly is a skill.

Day 23: Manual UPI booking reality

Visual idea: Manual payment flow diagram.

ReferralMe Page Caption

ReferralMe mentorship booking currently uses manual UPI verification.

Why?

Because payment gateway approval can take time, and we still want students to book sessions safely.

Flow:

1. Student submits payment reference
2. Admin verifies payment
3. Mentor receives confirmed booking
4. Session details are shared

CTA: Book mentorship with admin verification.

Personal LinkedIn Caption

Founder reality:

Payment gateways are not always easy when you are early.

Instead of waiting forever, we built a manual UPI verification flow for mentorship.

It is not the final system, but it lets us keep moving and learn from real users.

Progress beats waiting for perfect infrastructure.

Day 24: Safety/admin verification

Visual idea: Admin mentorship tab screenshot.

ReferralMe Page Caption

Mentorship booking on ReferralMe includes admin verification.

We track payment reference, mentor, seeker, topic, amount, status, and session progress.

This helps keep the flow organized while payment gateway approval is pending.

CTA: Use verified booking flow for mentorship.

Personal LinkedIn Caption

When building marketplaces, trust matters.

Students should know what they booked.

Mentors should know when payment is verified.

Admin should be able to track sessions clearly.

Even a manual process needs structure.

That is why I added admin verification into ReferralMe mentorship.

Day 25: Ratings and trust

Visual idea: Rating system concept.

ReferralMe Page Caption

Mentorship should become more transparent.

ReferralMe supports ratings after sessions so students can share feedback and future users can identify helpful mentors.

Good guidance should be visible.

CTA: Complete sessions, share feedback, and help improve the mentorship network.

Personal LinkedIn Caption

Ratings matter in mentorship.

Not because mentors should be treated like products, but because students need trust signals.

Was the session useful?

Was the mentor clear?

Did the student leave with next steps?

These signals can make ReferralMe better over time.

Day 26: Full product journey

Visual idea: End-to-end product journey video.

ReferralMe Page Caption

ReferralMe is becoming an AI placement system.

One journey:

Resume scan -> AI mentor -> 30-day plan -> interview prep -> mentorship -> referral guidance -> smarter applications.

This is not just about getting referred.

It is about becoming ready.

CTA: Try the full ReferralMe journey.

Personal LinkedIn Caption

I do not want ReferralMe to become only a referral marketplace.

That is too narrow.

The bigger opportunity is helping students become job-ready through one operating system: resume, ATS, AI mentor, interviews, mentorship, and networking.

That is a much stronger product direction.

Day 27: No job guarantee honesty

Visual idea: Honest promise / no guarantee graphic.

ReferralMe Page Caption

Important note:

ReferralMe does not guarantee jobs, interviews, or referrals.

What we help with:

- better resume clarity
- ATS awareness
- career direction
- interview preparation
- mentorship access
- professional referral guidance

Better preparation improves your chances, but outcomes are never guaranteed.

CTA: Prepare smarter with ReferralMe.

Personal LinkedIn Caption

I want ReferralMe to be honest from day one.

No fake job guarantee.

No fake referral guarantee.

No misleading promises.

The product should help students prepare better, understand gaps, and take smarter action.

That is valuable enough without overpromising.

Day 28: College/campus ambassadors

Visual idea: Campus ambassador invitation.

ReferralMe Page Caption

ReferralMe is looking for college communities and campus ambassadors.

If your college students need help with resumes, ATS, interviews, mentorship, and career direction, let's collaborate.

We want to help more students become placement-ready.

CTA: DM us to bring ReferralMe to your college.

Personal LinkedIn Caption

I am looking for campus ambassadors and college partners for ReferralMe.

The goal is simple:

Help students in colleges access better resume feedback, AI guidance, mentorship, and placement preparation.

If you know active student communities, I would love an introduction.

Day 29: Beta invite

Visual idea: Beta launch card.

ReferralMe Page Caption

ReferralMe beta is open for students and job seekers.

Try it if you want help with:

- ATS resume scan
- AI mentor guidance
- placement roadmap
- interview prep
- mentorship
- referral guidance

We are improving fast and want real feedback.

CTA: Try ReferralMe beta at referralme.in

Personal LinkedIn Caption

ReferralMe beta is ready for more feedback.

If you are a student, fresher, job seeker, mentor, or working professional, please try it and tell me what to improve.

I am especially looking for feedback on:

- AI Mentor
- ATS scan
- mentorship flow
- overall dashboard clarity

Building this in public.

Day 30: Month recap and next step

Visual idea: Recap carousel: what changed, what is next.

ReferralMe Page Caption

30 days of ReferralMe content.

Our mission is clear:

Help students become job-ready with AI guidance, ATS feedback, mentorship, interview preparation, and referral support.

Next, we will keep improving the product based on real user feedback.

CTA: Join ReferralMe and grow with us.

Personal LinkedIn Caption

30 days of building and marketing ReferralMe.

What I believe now:

The best product is not just a referral platform.

It is an AI Student and Career Operating System.

A place where students can prepare, track, learn, improve, get guidance, and move toward better opportunities.

This is just the beginning.

Reusable Hashtags

#ReferralMe #CareerGrowth #StudentCareers #ATSResume #ResumeTips

#PlacementPreparation #AIMentor #Mentorship #JobSearch #Freshers

#LinkedInForStudents #InterviewPrep #CareerCopilot #BuildInPublic

Simple Weekly Review

Track profile visits, post saves, comments, DMs, signup clicks, and actual product feedback.

Double down on posts that get saves and DMs, not only likes.

If ATS posts perform best, create more resume teardown content.

If founder posts perform best, share more product-building stories and lessons.

Every Sunday, convert the best-performing post into a carousel or short reel.
